Love Your Microbiome

Nutritional science and consumer awareness have followed a defined progression. From era to era, discovery and innovation led to opportunity in a very defined pattern. Each era leading to the next, naturally.

So from where we are today we can see the past—eras of innovation that led consumer demand all the way to the present day. And now we can position ourselves to be ready for the next massive opportunity.

SHARED EXPERIENCE:

The Founding of

LoveBiome

The founders and co-founders of LoveBiome have a proven track record of creating success.

They all come from the shared experience of building one of the most successful and innovative companies in the industry's history. The LoveBiome Team was the significant driver of the growth and success of Tahitian Noni.

This is where they gained their passion for the miracle of pure, organic botanicals. Their love of noni fuels their passion for botanical discovery that continues today.

Today the founders of LoveBiome share a vision of creating a business that reflects a culture of family, success, vision and personal growth at every level.

The LoveBiome founders learned that plants are much more than simply the organic matter we see, touch and taste. The geography, culture, history and environment of each plant is critical to understand and celebrate.

They learned this lesson with their discovery of noni. Their passion was fed by noni's culture, people, history, and geography. Living plants, living stories.

Now, one central belief drives
LoveBiome's business vision:

**PLANT
GIVES**

**LIFE
LIFE**

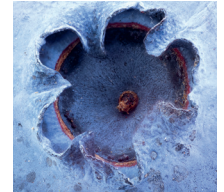

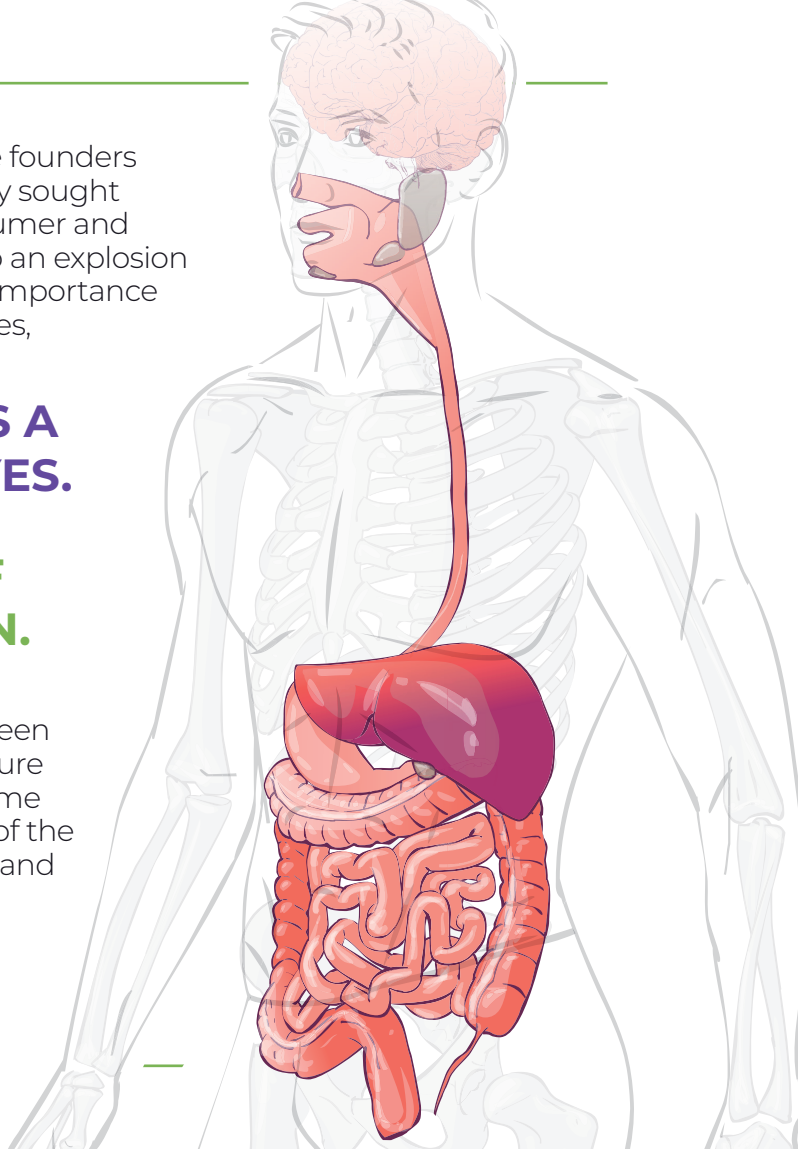

IS THERE
ONE THING
EVERYONE CAN FOCUS ON
EVERY DAY TO ACHIEVE
OPTIMAL HEALTH?

That was the question the founders of LoveBiome passionately sought to answer. And with consumer and research trends leading to an explosion of information about the importance of the human microbiomes,

**THE ANSWER IS A
RESOUNDING YES.**

**THE POWER OF
ONE WAS BORN.**

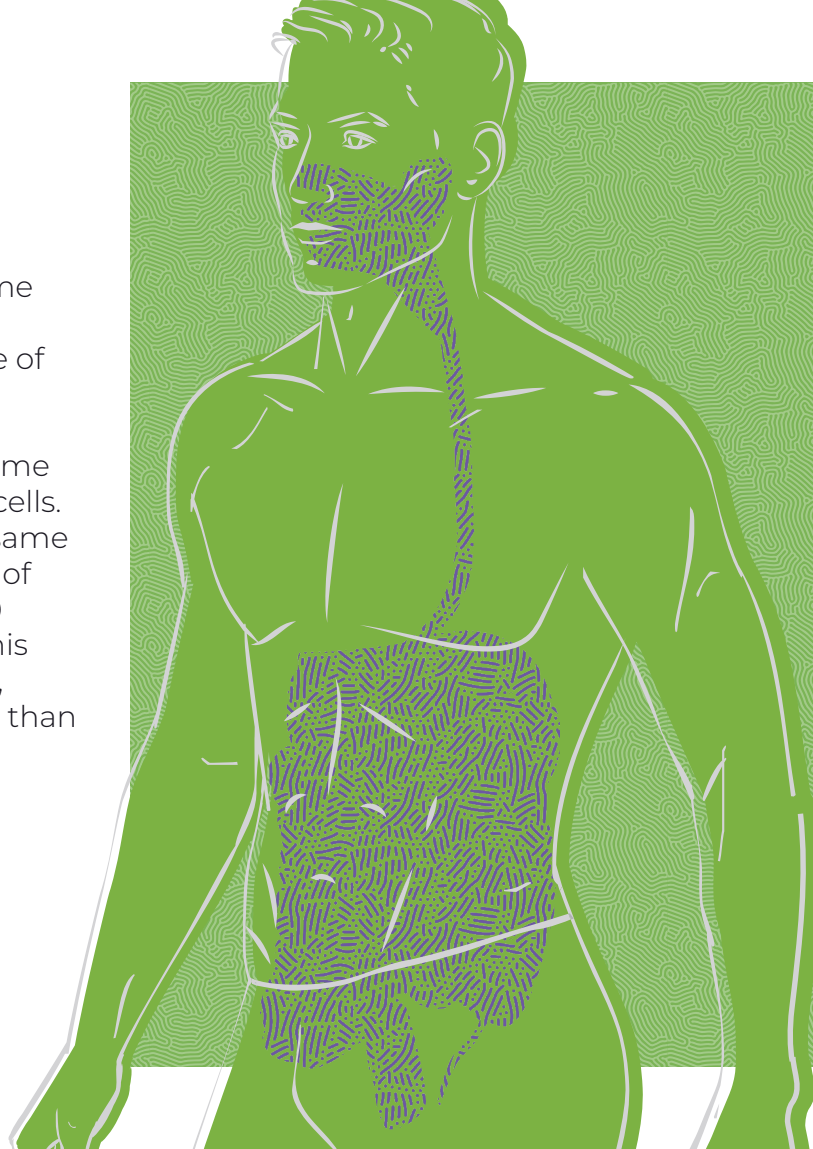

And the connection between the power of plants in nature and the human microbiome meant the launch of one of the most exciting companies and opportunities in history.

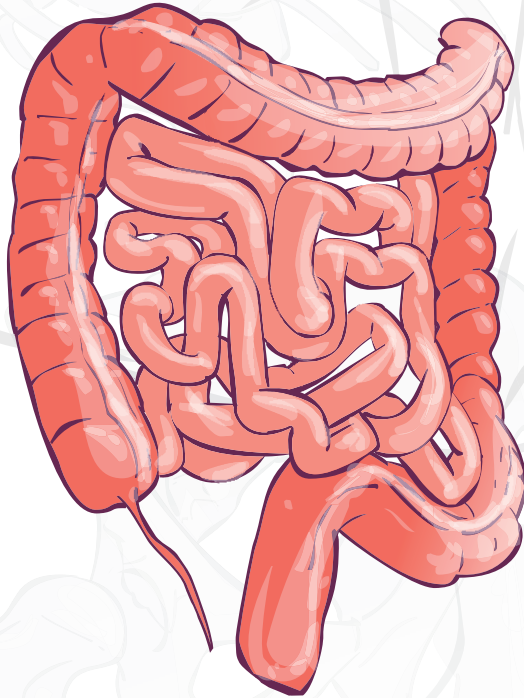

THE UNIVERSAL IMPORTANCE OF MICROBIOME HEALTH

The founders of LoveBiome quickly envisioned the potential and importance of microbiome health.

The human gut microbiome contains over 100 trillion cells. Its “mass” is roughly the same as the human brain. 90% of human DNA and 100,000 genes are contained in this biotic community. In fact, people are more bacteria than they are “human.”

MICROBIOME HEALTH IS HUMAN HEALTH.

COMPREHENSIVE HEALTH.

In their research, the LoveBiome team discovered more and more that the human gut microbiome really was the center of health, so to speak. Of all the concepts they encountered, this idea stuck the most. If the human microbiome is the center of health, this surely is the one thing they had been searching for.

Changes in the gut microbiome, they found, have a direct impact on every cell and physiological system in the body.

The application of this knowledge has enormous impact on the issues people face every day:

- **Weight Loss**
- **Sleep**
- **Mood, memory, depression, and comprehension**
- **Energy**
- **Athletic training and performance**
- **Immunity**
- **Healthy Aging**

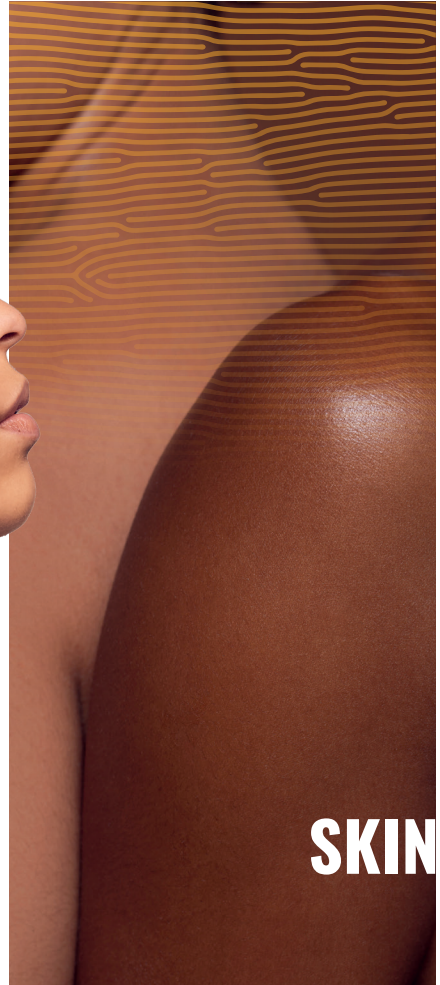

BRAIN

GUT

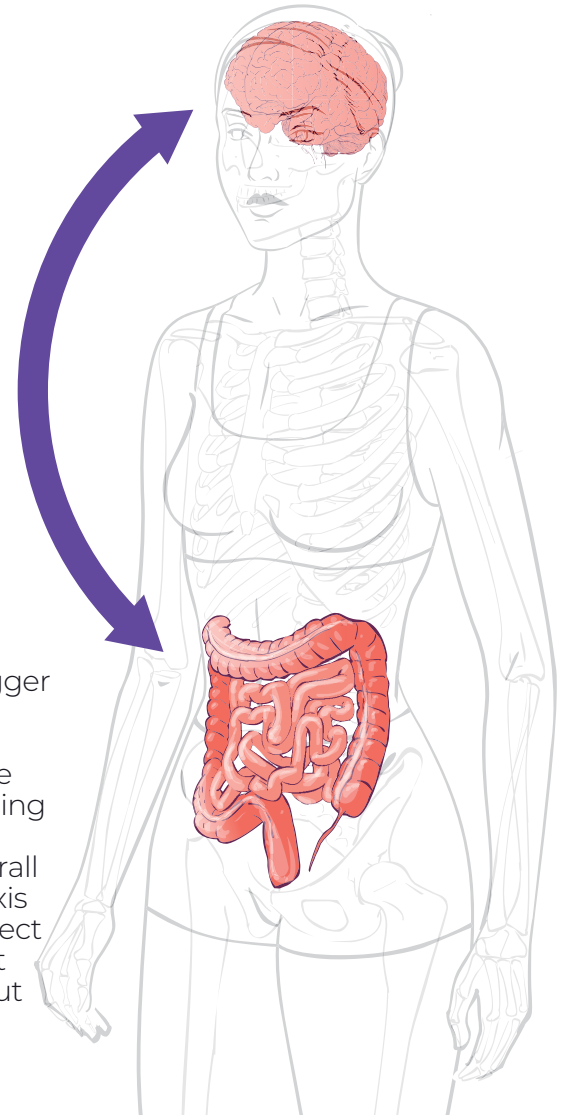

SKIN

THE GUT BRAIN SKIN AXIS

The LoveBiome team was inspired to learn that there is a direct connection between the human brain and the human gut microbiome. This gut-brain connection offers huge and important insight into mental health issues such as sleep, mood, depression, memory, and comprehension.

But the message is even bigger than the gut and the brain. Research has shown that skin is also a huge part of the “health axis” in the body. Caring for the skin microbiome has tremendous benefits to overall health. The gut-brain-skin axis teaches us that there is a direct link between the two largest microbiomes in the body: gut and skin.

LoveBiome is the vanguard of a new era of health and wellness.

THE ERA OF THE MICROBIOME

has created an explosion of scientific research and discovery. The idea of the microbiome as the center of health in the body has been validated again and again by research.

The background of the slide is a collage of various articles and social media posts related to microbiome health. On the left, there's a post with a woman's face and the text 'WRITTEN', 'RUN', 'Informa', and 'how your gut microbiome keeps you me'. Below it is a post with the hashtag '#FEMSmicrobiome', the date '27-06-2021', and the title 'The World Microbiome D and sustainability of ou'. Further down is a post titled 'About the t Health ion' and 'armacy'. On the right, there's a post titled 'is declared depression the single', 'y available treatments are able to induce remission', 'e time, more and more data suggests a repeated link biota, and susceptibility to a variety of mental health her risk factors. The nascent field of nutritional psychiatry between our current treatments for mental health conditions y: adjusting our diet.' Below that is a post titled 'pharmaceutical or psychological interventions should be site: mental health is multifactorial, and often requires'. Further down is a post titled 'n-Fiber Recipes' and 'y what you eat but also by'. Below that is a post titled 'bacteria And Mental ics And Depression Are'. At the bottom right, there's a post titled 'thy gut, health' and 'the trillions of ba', with a sub-header 'Home / Articles / Of Microbes and Mental Health: Eating'. The date 'Feb. 14, 2020' is also visible. The word 'di' is partially visible. At the very bottom, the text 'when most of us thi' is visible.

TODAY

microbiome health remains relatively unknown to consumers, even though governments, companies, researchers, and universities share a profound interest in microbiome health.

But it won't remain hidden for long. Interest is growing exponentially, and within...

FIVE YEARS

microbiome health will be among the most important nutritional health topics discussed online and reported in all media.

Microbiome health will become the most critical influence in health, nutrition, recovery, prevention and even beauty.

By the end of the decade, the size of the microbiome health market is slated to reach nearly...

\$90B USD

lovebiome

IS DEDICATED TO THE
CARE AND KEEPING
OF YOUR AMAZING
MICROBIOMES.

Its products are plant-based solutions designed to do three things:

1 POPULATE

each microbiome with a rich and diverse array of friendly bacteria.

2 FEED

that bacteria to achieve optimal results for overall health.

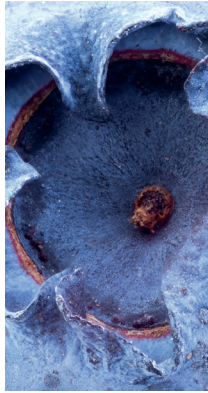

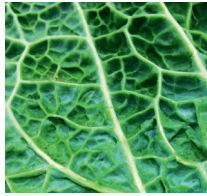

3 DETOXIFY

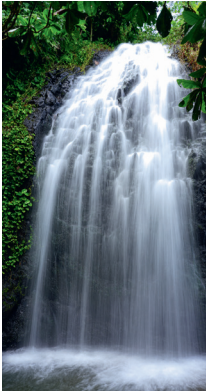

the body and skin using the power of nature.

And the LoveBiome partners use their passion for plants to accomplish these goals.
Plant Life Gives Life.

SELECTED WITH CARE

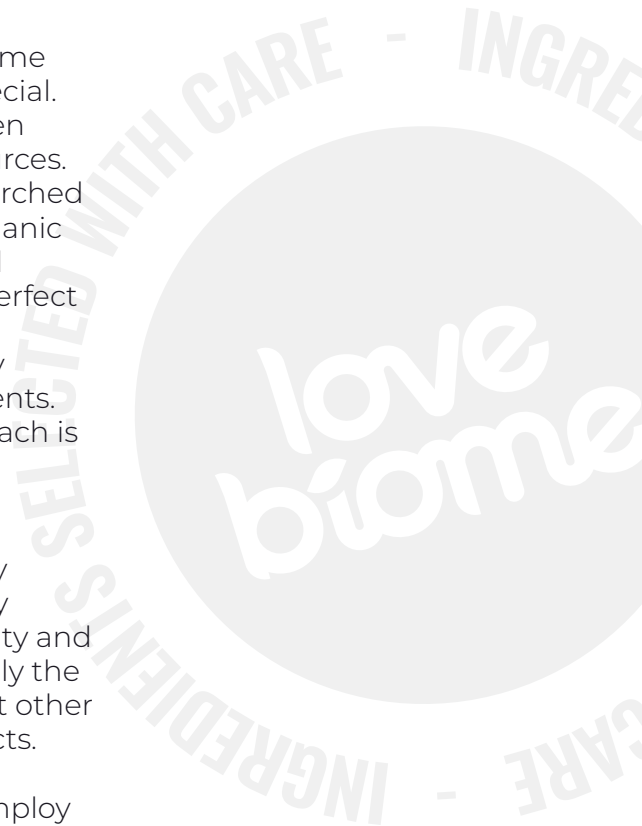

Every ingredient LoveBiome uses in its products is special. They were carefully chosen from the world's best sources. The LoveBiome team searched remote wonderlands, organic farms, fresh markets, and trusted vendors for the perfect combination of nutrient-rich, microbiome-friendly compounds and ingredients. LoveBiome's botanical reach is global.

And every ingredient is carefully scrutinized. They are chosen only after they demonstrate bioavailability and compatibility with not only the human microbiomes, but other ingredients in the products.

LoveBiome's formulas employ prebiotics, probiotics and postbiotics. Helping to create the very best environments for the body's microbiomes is the one and only purpose of LoveBiome products.

LoveBiome products focus on polyphenol-rich botanicals, fermented foods, nutrient-dense fruit and vegetable blends, and digestive enzymes.

All to answer one simple question:

IS THERE
ONE THING
EVERYONE CAN FOCUS ON
EVERY DAY TO ACHIEVE
OPTIMAL HEALTH?

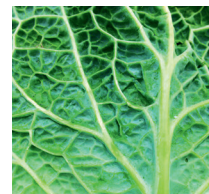

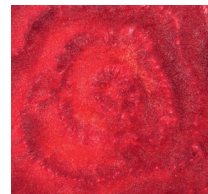

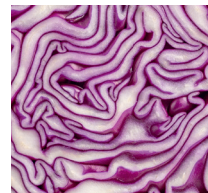

INTRODUCING
lovebiome
PRODUCTS

PhytoPower

PhytoPower begins with 40 phytonutrient-dense fruits and vegetables chosen to represent the distinct color groups of nature: Blue, Purple, Red, Orange, Yellow and Green. Each of these colors possess unique phytonutrients impacting microbiome diversity, balance and health.

To that, PhytoPower adds a distinct probiotic blend, a powerful prebiotic blend, and a full range of digestive enzymes. There is no other product in the world comparable to PhytoPower.

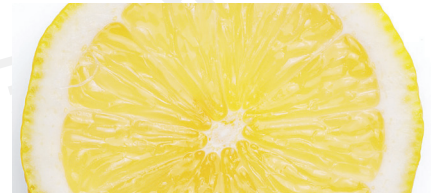

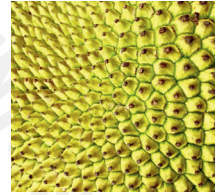

Next Balance

Next Balance was designed to promote a healthy, balanced gut microbiome. Drinking it every day will help your body cultivate the ideal biotic environment in your gut.

Next Detox

Next Detox was formulated to help your gut microbiome direct the detoxification of your entire body. With the help of Next Detox, your gut will gently and effectively cleanse itself of the nasty toxins, waste products and oxidative substances that make their homes in your gut and throughout your body.

Both Next Detox and Next Balance feature LoveBiome's proprietary fermentation process. This fermentation process takes noni into a whole new stratosphere of benefits. Studies have shown that this fermentation process increases noni's polyphenol count by at least 25%.

Postbiotic Body Soufflé

YOUR SKIN MICROBIOME
IS INSEPARABLY CONNECTED
TO YOUR OVERALL HEALTH.
SO, CARING FOR THE SKIN'S
MICROBIOME IS **VITAL NOT**
ONLY FOR HOW YOU LOOK,

BUT HOW YOU FEEL.

THIS LUXURIOUS BODY
SOUFFLÉ FEATURES A
BLEND OF GLOBALLY
SOURCED **POSTBIOTIC**
INGREDIENTS, SPECIALLY
CHOSEN FOR THE SKIN'S
UNIQUE MICROBIOME.

120 ML (4.05 FL OZ) e

Postbiotic Body Souffle

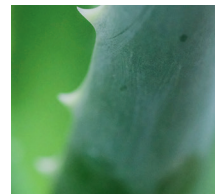

Postbiotic Body Souffle is a creamy, deeply luxurious body moisturizer with distinctive postbiotic impact ingredients designed to boost the strength of your skin's microbiome.

The concept of postbiotics is among the newest and most exciting breakthroughs in skin health.

Every use of Body Souffle feeds the skin with postbiotic impact ingredients like edelweiss, green tea, shae butter, aloe vera, cornflower, coconut oil, lactobacillus ferment, and beta glucan.

WHAT ARE POSTBIOTICS?

Postbiotics are the nutrient-dense byproducts of the interaction between prebiotics and probiotics. Think of it this way: In nature there are flowers, bees and honey. Prebiotics, like flowers, supply fuel. Probiotics, like bees, do the work. Postbiotics, like honey, can be consumed and even used topically for a myriad of benefits.

PERFECTED COMPENSATION

LoveBiome has built the world's best opportunity to accompany its superb products.

LoveIncome

is for building success with teams and experiencing the life-changing reality of financial freedom.

LoveCash

LoveBiome has built the world's best opportunity to is the LoveBiome affiliate program. A front-end income opportunity unmatched in the industry.

LoveBest

is the super-charged rewards of success and lifestyle at the top of the LoveBiome compensation structure.

LoveBiome has a deep respect for the plants and botanicals of the world, and also the people who bring those treasures and botanicals to life.

One important cornerstone of the LoveBiome culture is travel—to gain perspective, unlock possibilities, and have all kinds of fun.

CUL

TURE

GLOBAL EXPANSION

Expansion is in our DNA. A global network of health-first entrepreneurs is what we're building.

LoveBiome is already open for business and ready to ship product in countries in every continent in the world. The future is bright for LoveBiome as we continue to open new doors and explore new possibilities.

THIS IS THE BRAND, THIS IS THE TIME.

LoveBiome is a brand poised to succeed in the Era of the Microbiome.

LoveBiome's founders have done it before. They enjoy a powerful shared experience of success.

LoveBiome's passion is comprehensive microbiome health using the power of plants.

LoveBiome's products are incomparable, made with ingredients and formulas designed for pure nutrition.

LoveBiome's opportunity is perfectly tuned for three levels of success in an evolving, exciting industry.

This is the brand that will dominate the Era of the Microbiome.
